

Plan to SucceedTM with Acterys Apps

Reporting, Consolidation & Planning in the Quickest Way

Super smooth, quick implementation of reporting planning and consolidation for our 30 global entities.

Antoine Meunier
Investment Manager
Worms Safety

Key Features

Quick Connectivity: Connect any system in minutes and manage unlimited companies seamlessly

Auto Data Integration: Automatic data loading, updates, and consolidation on a cloud-based Azure SQL database

Optimized for Analysis: Database structured for comprehensive analysis, business modeling, and precise planning

Customizable Data Models: Tailor data models to meet your unique requirements

How It Works

- **Data Models in Minutes:** Collate data from diverse sources and companies into a single, scalable model primed for analytics and planning.
- **Built-in Business Logic:** Access essential business metrics, time intelligence, currency conversions, and more.
- **Ready-to-Use Reports & Dashboards:** Engage with interactive dashboards, best practice reports, and data forms for Power BI & Excel.
- **Planning Enabled Power BI Visuals:** Market-leading features for budgeting and planning (detail, top-down, driver-based, etc.).

myhealth
MEDICAL CENTRE

Myhealth reduces the time for building reporting model for Xero data from 5 days to 1 day.
