

# Empower Workforce with Passwordless Authentication: Boost Logins by 160%

## About Hideez Group Inc.:

Hideez specializes in passwordless IAM solutions for organizations. Our approach is to provide a seamless authentication experience without the need for traditional passwords, one-time passwords, or SMS codes. We believe in building trust by providing a fast and intuitive access to corporate resources. Our primary customers are businesses that need to protect their systems and data without compromising productivity and security.

## What we offer

Hideez Authentication Service offers a unique combination of hardware and software tools that enable smooth logical and physical access for businesses.

With the Hideez Service, employees can unlock their desktop computers and access their accounts using several authentication methods: personal smartphones, endpoints (PC, tablets) with a built-in biometric sensor, or wearable FIDO2 security tokens. Our versatile mix of software and hardware tools provides great adaptability that covers all possible authentication scenarios, depending on the needs of your organization.

The solution integrates with different service providers (Citrix, VMWare, SAP, Office, etc.), Microsoft Active Directory and Azure AD, offering a unified authentication experience.

## What our customers are saying

"Hideez Service has improved our security posture and made our workforce more productive. We no longer need to remember passwords or wait for SMS codes to access our systems. The integration with Azure AD was seamless, and the support team was knowledgeable and responsive."

– Oleksandr Naydemko, CIO,  
Farmak
