Leah Agentic CLM: End-to-End Contract Lifecycle Management

Harness the power of agentic AI to transform your contracting processes. Automate routine tasks, unlock insights, and enable your legal team to focus on high-value, strategic work.

Smarter, Faster Contract Management

Leah Agentic CLM is the result of the most innovative, transformative AI technologies in the market brought together to power your contracting processes. Built using best-of-breed AI technologies, including OpenAI, Google, Anthropic and more, Leah is there for you every step of the way, from contract creation through negotiations and post-execution.

Now, it's easier than ever to do more with less - less time and less resources.

Automate Processes Streamline contract creation, review, and approvals by automating routine tasks and enterprise-wide workflows across legal, sales, and procurement.

Increase Visibility Gain real-time insight into contracts, obligations, and performance across the entire contract lifecycle and organization.

Reduce Risk Proactively identify and mitigate risk by enforcing playbooks, ensuring compliance, and standardizing contract workflows.

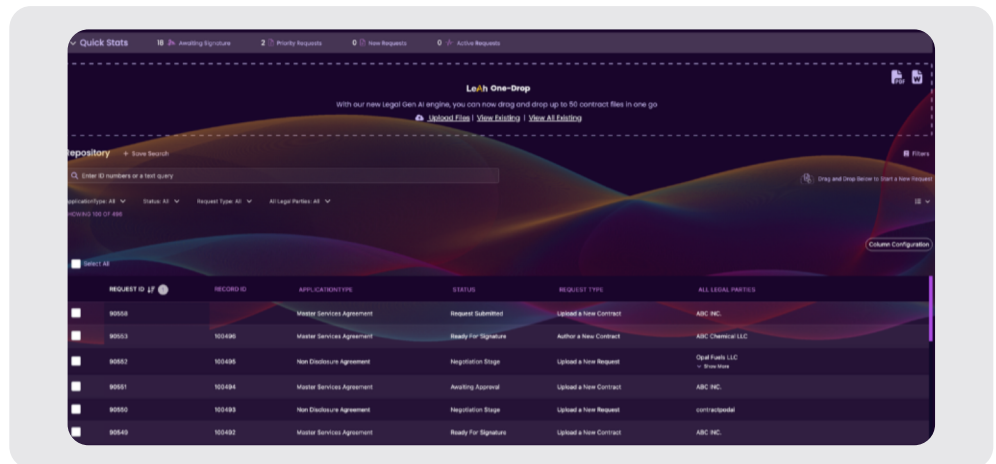

01
Contract
Management
Dashboard

Gain complete overview of your legal and contract activities - all in one place. Bring together key insights, quick navigation, and actionable data to help your teams work smarter and faster. With intuitive navigation and real-time visibility into requests, approvals, and obligations, the dashboard empowers you to stay on top of every stage of the contract lifecycle.

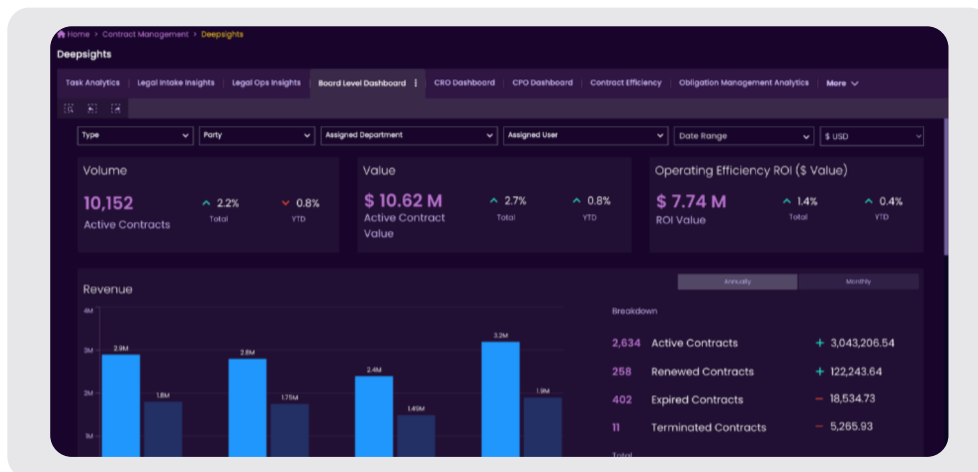

02
Interactive
Repository

Leverage an easy-to-use, interactive repository that helps you access, manage, and move contracts forward - all from a single, intelligent workspace. With powerful search functionality, intuitive design, and role-based governance, it enables legal and business users to find, save, and share information securely and efficiently.

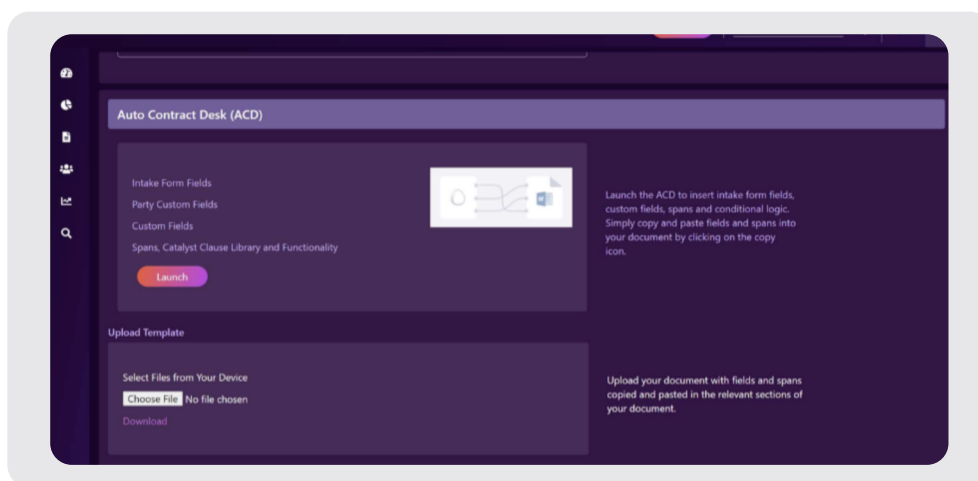

03
Search Analytics

Access dynamic reporting, interactive visualizations, and data-driven insights - powered by Qlik Analytics - to help legal and business teams analyze performance, improve contract management, and reduce risk through standard and custom reports tailored to their needs. AI-powered advanced search across documents and metadata enables faster discovery, advanced queries, and bulk updates or approvals across multiple records to boost productivity and control.

04
Auto Contract Desk

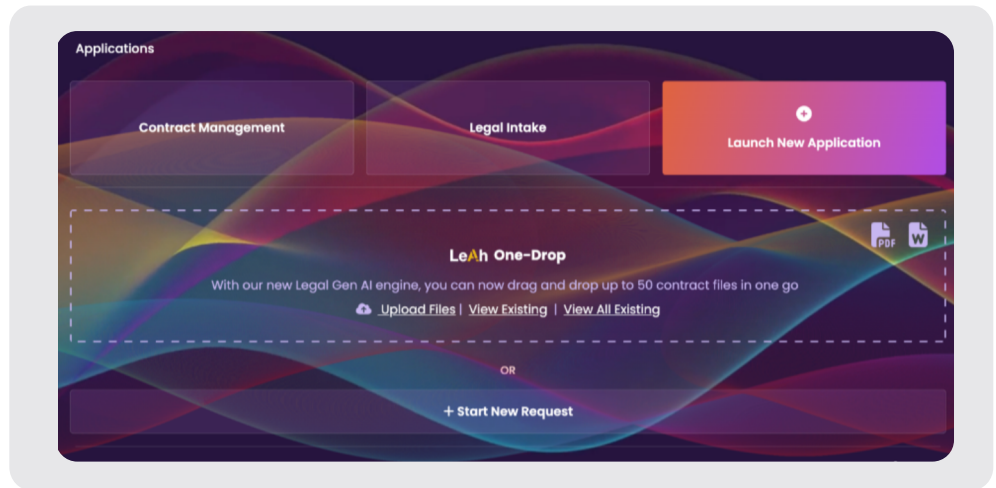

The Auto Contract Desk (ACD) is a powerful tool designed to automate the generation of contracts and legal documents. It assists legal teams by streamlining the creation process through advanced automation. ACD drastically reduces preparation time and minimizes errors associated with manual drafting while ensuring adherence to organizational risk management policies.

05

Leah OneDrop

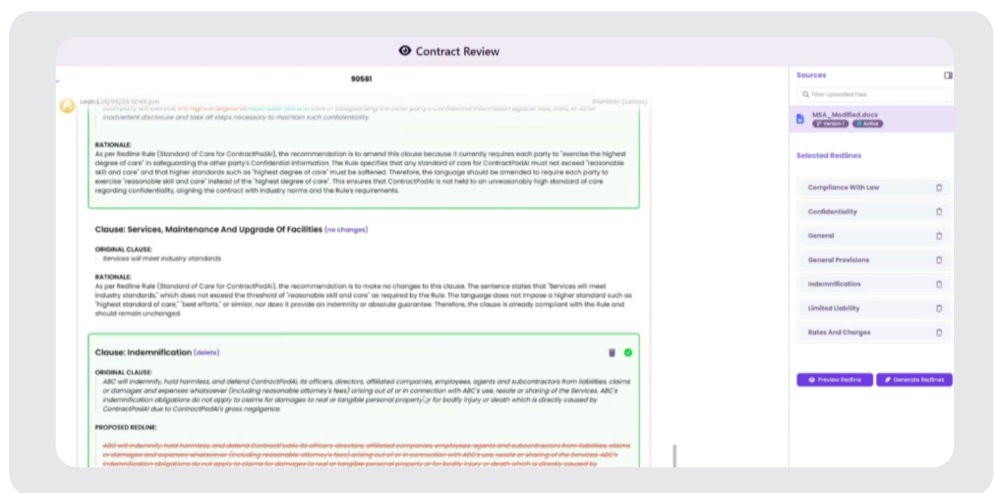

Leah One-Drop transforms contract management by automating the entire contract management process - from file upload to workflow. By simply dragging and dropping a document into the CLM, Leah analyzes, classifies, and extracts key data, eliminating the need for manual setup or prolonged legal review. Leah also detects previously negotiated terms, allowing teams to reuse and reference prior agreements.

06

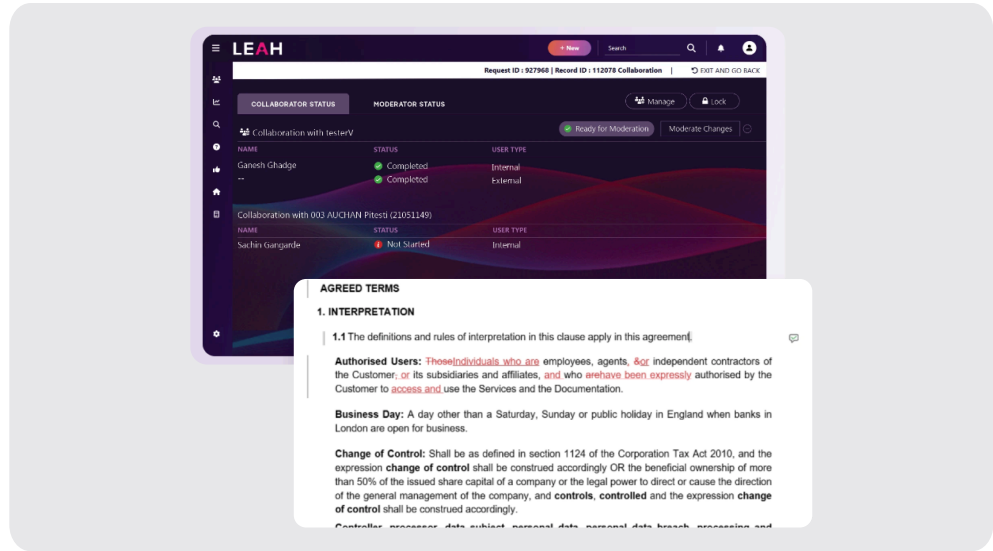

Review & Redlining

The Contract Review Agent revolutionizes how legal and commercial teams review, negotiate, and approve contracts. Leah automates redlining, applies predefined negotiation strategies, and delivers intelligent insights - all while keeping humans in control. By combining agentic AI powered automation, contextual understanding, and interactive editing, Leah transforms manual review cycles into streamlined, strategic decision-making.

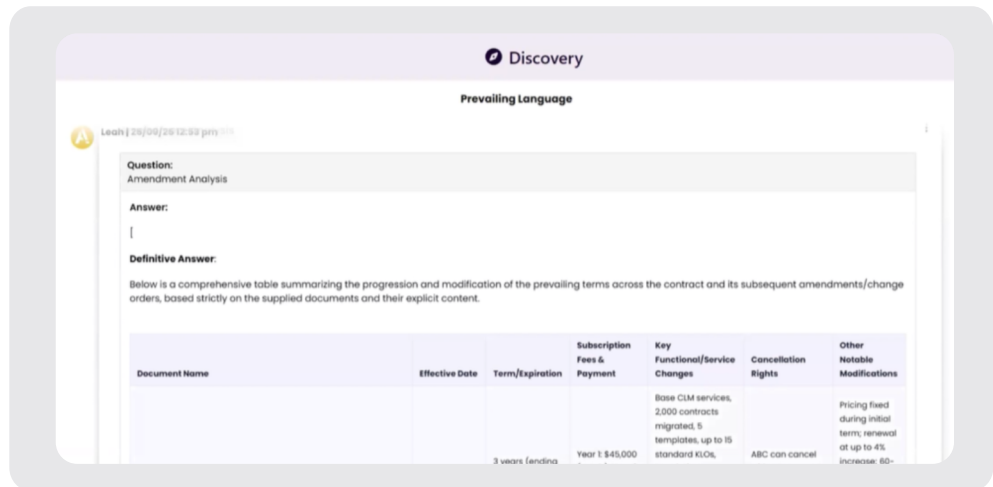

07
Microsoft Word
Integration

The Word Add-In brings AI-powered review and redlining capabilities directly into Microsoft Word - allowing users to continue working seamlessly in their familiar environment. Users retain full access to Word's native features while interacting with Leah for real-time contract insights, recommendations, and redlines.

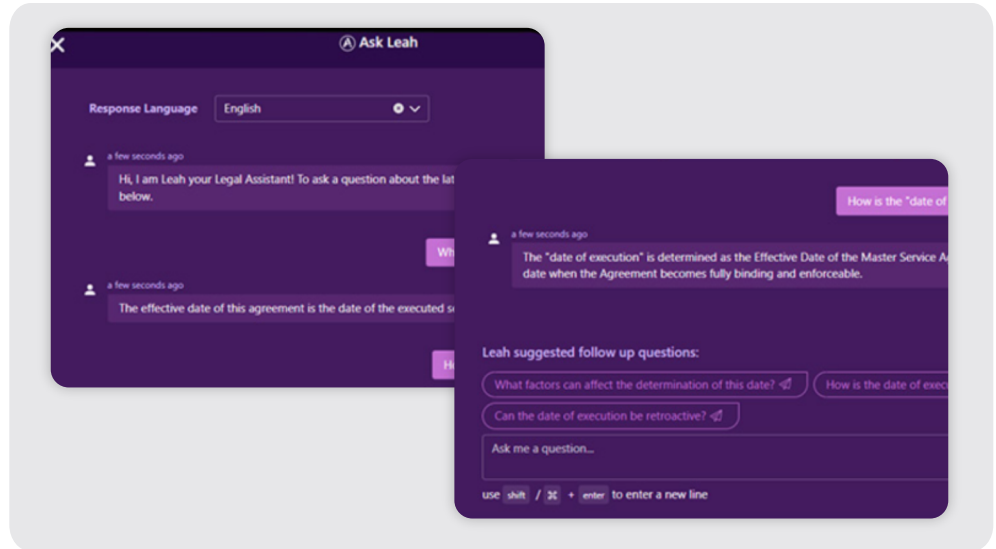

08
Leah Discovery

Enable your teams to analyze contracts collectively - not just document by document - so you can understand how agreements relate to one another, what language prevails across versions, and where risks or obligations emerge across your entire corpus.

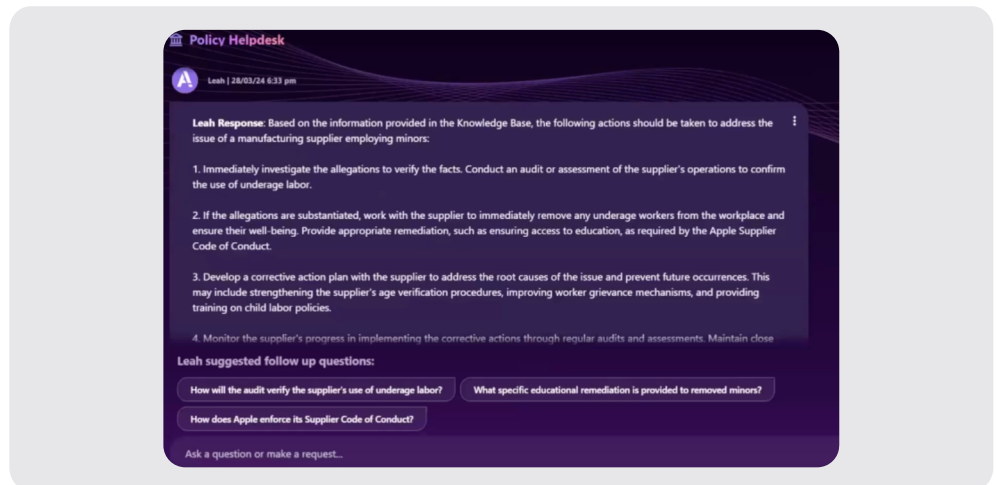

09
Ask Leah

Access an on-demand, ad-hoc question-and-answer feature that delivers instant, AI- driven assistance across every stage of contract review and negotiation. By leveraging conversational intelligence, users can quickly gain clarity on complex language, explore negotiation strategies, or analyze specific clauses - all without leaving the document.

10
Policy Helpdesk

Give users quick access to organizational knowledge, allowing them to ask questions right from the contract management dashboard and receive accurate, reference-backed answers in moments - keeping work moving without searching through systems or documents.

Leah Agentic CLM

Leah Agentic CLM redefines contract lifecycle management by combining deep legal expertise with agentic AI to automate work, surface insight, and reduce risk at scale. From intake and drafting to negotiation, execution, and post-signature governance, Leah enables legal and business teams to work faster, smarter, and with greater confidence-while focusing their time on the decisions that matter most.
