Legal Brief

Leah Legal

Leah is a cutting-edge AI solution designed specifically by lawyers to empower legal teams to enhance their workflows with unprecedented gains. Powered by agentic AI, this innovative technology revolutionizes the way legal documents are generated, reviewed, analyzed and summarized.

Unlock Efficiency, Accuracy and Insights

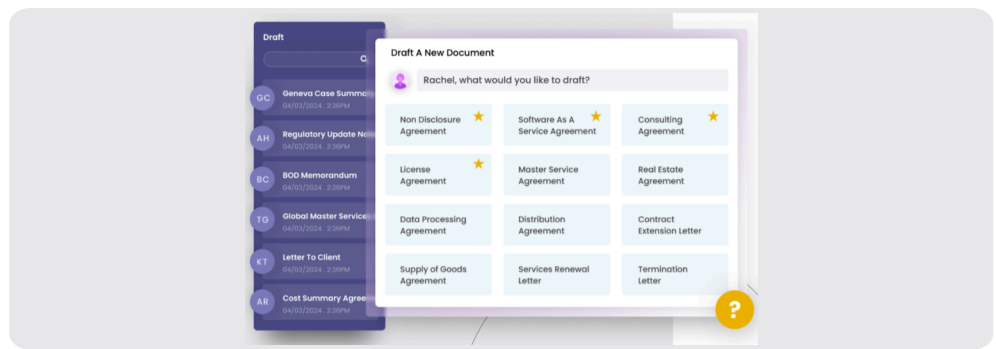

Leah Legal delivers significant business value by unleashing transformative potential through operational excellence, scalability, and accuracy.

- **Increased Efficiency:** Traditional manual document review and analysis processes are time-consuming and prone to human error. By harnessing the power of AI, Leah automates these tasks, drastically reducing the time required to review and analyze vast amounts of legal documents.
- **Enhanced Accuracy:** Legal documents often contain intricate details and complex language. The risk of missing crucial information or misinterpreting legal clauses is significantly mitigated with Leah. Leah can comprehend and extract pertinent information with references, ensuring that legal teams have access to comprehensive and precise insights.
- **Comprehensive Insights:** Leah's ability to extract and analyze information from documents equips you with insights in a fraction of the time. Identify relevant clauses, key details and critical information effortlessly across multiple documents and cases to identify connections and drive impactful legal analysis. With Leah you have more time to focus on critical thinking and complex legal analysis.

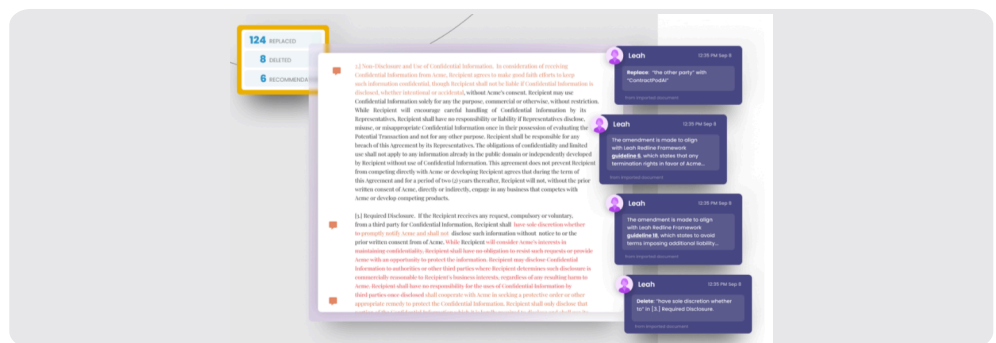

01
Leah Draft

Leah makes legal drafting faster and more accurate by intelligently using your templates, prior agreements, and knowledge sources to guide the process. Leah helps you produce accurate, consistent, well-formatted documents in a fraction of the time - from case summaries and regulatory updates to contracts and memos - highlighting what's missing and suggesting what comes next. You can start from scratch or build on what you already have, and Leah will walk you through each step, generate polished drafts, and keep everything compliant and aligned.

02
Leah Contract Review

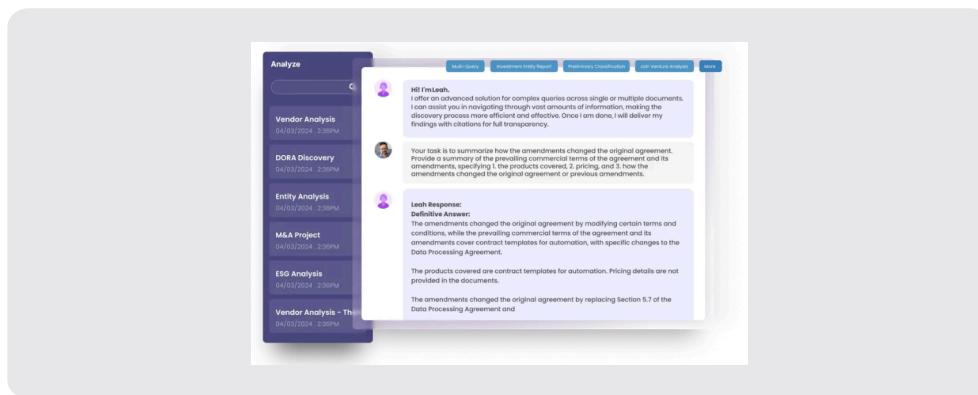

Simplify contract review with AI that helps you quickly review, summarize, and redline agreements in one intuitive interface. Just upload a contract to get instant analysis, clear summaries, and risk insights, and easily spot missing, ambiguous, or unusual clauses to keep reviews consistent and compliant across teams. Collaboration becomes effortless with shared visibility, contextual explanations, and interactive prompts that guide clause-specific redlines and clarifications.

03

Leah Analyze

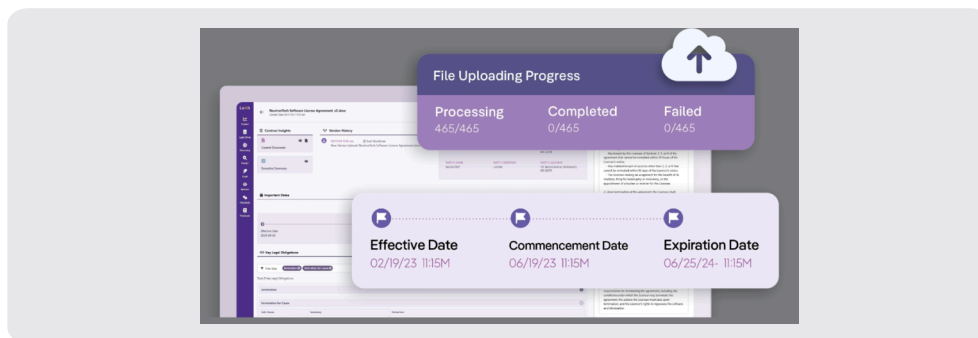

Extract clauses, parties, and key data points instantly to reveal insights, gaps, and relationships across all your documents at once. With analysis tailored to your workflows and industry requirements, your teams get precise, relevant, and actionable results that accelerate decision-making. And with sourced insights, visual patterns, and comprehensive cross-document analysis, they gain the transparency and confidence needed to move faster with clarity.

04

Leah Drive

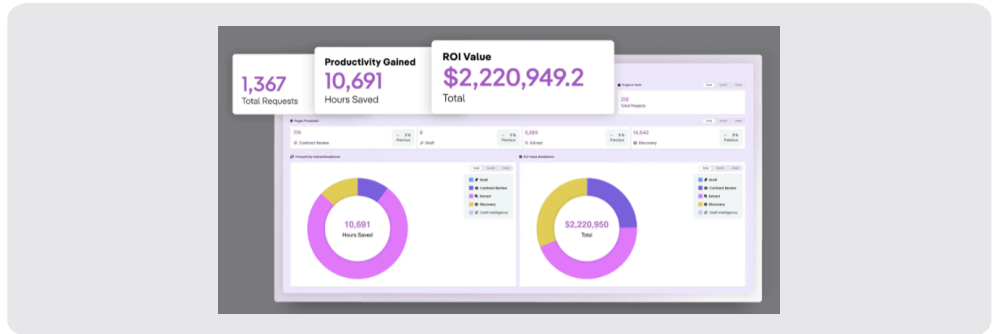

Turn unstructured data into searchable, actionable intelligence, and get insights directly from your document repository through a simple conversational interface. Leah ingests, classifies, and analyzes your legal documents to turn them into structured, insight-ready data. Automatically summarize, extract, and visualize key information so your documents become clear, actionable insights. And with natural, topic-based queries, you can instantly surface trends, key clauses, and recommendations across your entire library.

05

Leah DeepSights

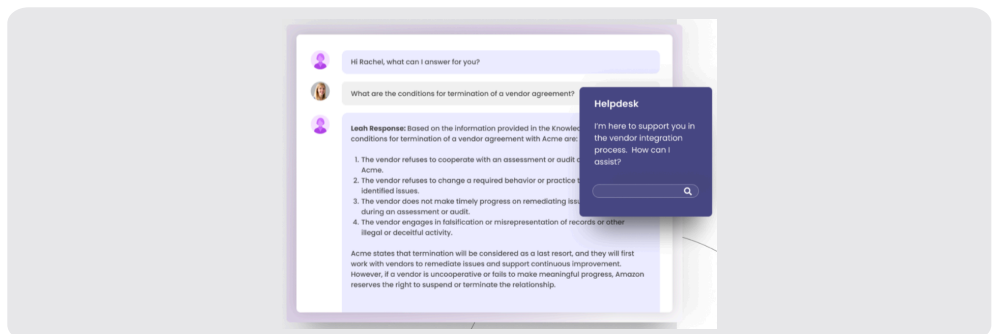

Transform complex data into clear dashboards and visuals that update in real time. Leah gives you instant visibility into productivity, ROI, and cost savings with out-of-the-box dashboards that track performance across legal tasks. You can customize metrics, reference costs, and visualizations to reflect your organization's needs, and build live, interactive dashboards that refresh automatically - making it easy to explore data, spot trends, and share insights effortlessly.

06

Leah Helpdesk

Get quick, reliable answers to legal and policy questions by giving every business user on-demand access to your company standards, negotiation playbooks, and compliance guidance. With an AI- powered legal helpdesk, users receive accurate, policy-aligned responses and guided recommendations that support informed decision-making. And because the system is customized with your internal knowledge base, the guidance is always precise, context-aware, and tailored to your organization.

Secure, Responsible, Legally Trained AI

- **Deep Domain Expertise:** Leah has a team of legal experts, data scientists, and machine learning engineers who bring together a wealth of domain knowledge. By adopting a multidisciplinary approach, we ensure a comprehensive understanding of legal terminology, nuances, and principles, which serves as the bedrock for Leah's training.
- **Legal Training:** Leah has undergone extensive training tailored specifically to legal. Leveraging curated redacted documents and interactive prompt engineering, Leah has been further fine-tuned, enabling her to recognize and comprehend legal terminology, interpret complex legal concepts, and analyze the language within legal data. This level of specialized training has equipped Leah with the expertise to provide accurate analysis of legal documents.
- **Optimize Performance:** Our Legal Engineering team is focused on refining and optimizing Leah's performance. This is achieved through iterative training cycles. Leah is fine-tuned to address the discovery use case, ensuring its suitability and effectiveness. As part of the training process, our team has reinforced Leah's ability to analyze different legal perspectives, consider various interpretations, and generate a full analysis delivering a higher-performing AI solution, all within the bound of legal frameworks.
- **Ethical & Regulatory Compliance:** Leah underwent training to uphold ethical and regulatory standards, encompassing client confidentiality, data privacy, and compliance with legal and industry regulations. We emphasize building AI on a robust knowledge base to ensure maximum impact while prioritizing these important considerations.

With Leah Legal, your team will benefit from powerful, innovative technology. The solution's intuitive and precise features encourage responsible usage and enhance efficiency, accuracy, and insight visibility. Leah Legal supports contract drafting, extracting, discovery, and redlining to save you time and money. Additionally, Leah Legal ensures ethical and regulatory standards through legal training and guardrails, allowing you to utilize the power of AI, with the confidence of robust data security and ethical guardrails.
